Professional Experience

Software Developer Intern (Full Stack) | *Amar Packers*

May 2026 – June 2026

Remote

- Architected an Enterprise Resource Planning (ERP) web application using the MERN stack (React, Node.js, Express.js, MongoDB), digitizing core business operations and replacing 100% of manual ledgers.
- Engineered RESTful APIs with Role-Based Access Control (RBAC) and JSON Web Tokens (JWT), securely managing data access for 50+ regional and finance staff members.
- Built modular UI components in React and optimized backend database queries, reducing operational manual overhead by 90% and decreasing page load times by 40%.

Cloud & Data Analytics Intern | *VisionX Studio*

Feb 2026 – Apr 2026

Remote

- Developed serverless data processing workflows leveraging Amazon Web Services (AWS S3, AWS Lambda) and Python, effectively transforming over 500GB of multi-source enterprise data.
- Conducted Exploratory Data Analysis (EDA) and automated data cleaning protocols using Pandas and SQL, increasing cross-functional reporting efficiency by 35%.

Technical Projects

Full-Stack Enterprise ERP System | *React, Node.js, TypeScript, MongoDB*

Aug 2026 – Present

- Engineered a production-ready Full Stack ERP application to automate manufacturing lifecycles, processing over 1,000 inventory items and securing production tracking operations.
- Configured continuous deployment (CI/CD) pipelines and backend session routing, hosting the frontend on Cloudflare Pages and the REST backend on Render to achieve 99.9% uptime.

TerraStorm – Cloud-Native AI Platform | *Python, AWS Serverless, Django, ML*

Jan 2026 – Mar 2026

- Architected a Cloud AI platform utilizing an event-driven AWS serverless architecture (S3, Lambda, SageMaker) to automate land-use change detection across 10,000+ square kilometers of satellite imagery.
- Integrated Amazon SNS for automated real-time alerts and deployed a Django-based administrative dashboard, reducing environmental monitoring report generation time by 60%.

Brains – MERN Stack CMS | *React.js, Node.js, Express, MongoDB, Tailwind CSS*

Nov 2025 – Dec 2025

- Developed a Content Management System (CMS) enabling full CRUD operations, empowering over 200 users to securely create and organize digital knowledge bases.
- Secured application endpoints via JWT authentication and maintained a modular TypeScript codebase, reducing runtime errors by 25% and improving system maintainability.

Technical Skills

Frontend Development: React.js, Next.js, TypeScript, JavaScript (ES6+), Tailwind CSS, HTML5, CSS3, UI/UX

Backend Development: Node.js, Express.js, Python, Django, FastAPI, RESTful API Design, Microservices, System Design

Cloud & DevOps: AWS (EC2, S3, Lambda, API Gateway, SNS, SageMaker), Docker, Serverless Computing, CI/CD, Git

Databases & Data: MongoDB (NoSQL), PostgreSQL, MySQL, SQL, Mongoose ORM, Data Modeling, Redis

Education

Bachelor of Technology in Computer Science Engineering

Aug 2024 – May 2028

KIET Group of Institutions

Ghaziabad, UP

- **Core Coursework:** Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Database Management Systems (DBMS), Operating Systems, Computer Networks.

Certifications & Achievements

AWS Certifications: AWS Certified Developer (Associate), AWS Data Engineer (Associate), AWS AI Practitioner.

Hackathons: Secured **1st Position** out of 150 teams at the Smart India Hackathon (SIH); actively competed in 10+ technical hackathons.
